

Speaker Profile

2010 SQHN Conference

Dr. Olusegun Adeniji, MCP, CCNP **System Architect, Ampersand Logistics**

Adeniji Olusegun Samuel Graduated from Ladoko Akintola University of Technology in 2002 with MB,BS having acquired Microsoft and Cisco Network Certification while still in school.

He started as a medical officer working around a number of private hospitals around the country with bias in Cardiology, before taking up the position of System Architect with an IT firm.

He has been interested in the incursion of Information Technology into Clinical Practice with novel solutions and technology assimilation. Has carried out a number of studies on application of cutting edge technology in Patient management these include; smart cards, digital ink/pen, gprs/instant messaging in telemedicine, document management, intelligent character recognition, handwriting recognition and advanced form modeling.

Some of the studies are:

- Comparison of Three Methods of Entering Clinical Information in a Triage System.
- A review of content-based image retrieval systems in medical applications – Clinical benefits.
- DICOM structured reporting: Problems and challenges in implementation of PACS.
- Evaluating the impact of structured forms in Clinical Settings.
- Evaluating the impact of GPRS and Digital Ink on data aggregation in Clinical Trials.
- A retrospective study of Data Archiving in Clinical Practices.
- Evaluating the impact of Managed Care on Quality of Healthcare – Subscribers' Perspective.

He presently works with Ampersand Logistics as a Programmer and Researcher.

He is married with children.
